TRIBUNE BAY PARK RECREATION ENHANCEMENTS

BRITISH COLUMBIA | BC Parks

BC Parks is excited to welcome campers to Tribune Bay Park. Since acquiring land adjacent to the park in 2021, BC Parks has been creating a long-term plan to enhance the natural, cultural and recreation values at the park.

While there won't be many visible changes for the 2025 camping season, improvements are coming and the campground will look different in summer 2026. Here's what is underway:

NEW LAYOUT AND CAMPING OPTIONS

A complete redesign of the current campground is underway! New sites will include a variety of camping options and sizes, including pull-through sites and small, basic cabins. A variety of electrified and non-electrified sites will be offered, as well as new pit toilets and shower building.

REDUCED CAMPSITE DENSITY

The re-built campground will include more space and privacy between sites by reducing the number of campsites in the current campground. Options to rebuild the additional campsites at a new location in the park and being considered. Once the project is complete a similar number of campsites will be available.

This change will come about in phases with a temporary reduction in campsites for the 2026 season.

ENHANCING VISITORS' EXPERIENCE

Here are some other changes that are being made to enhance your experience:

- Improved access to the beach,
- A new playground,
- Gravel resurfacing for roads and campsites,
- Universally accessible showers, and
- Multi-year native planting plan, including Pacific crabapple, salmon berry and nootka rose.

The campground will also prohibit wood-burning campfires, which will provide healthier air for visitors and a lower risk of wildfires.
